

Certificate of Analysis

Product Description	MSRV Medium Base, Modified		Cat. No.	EX-GCM245
Specification	250g/bottle		Batch No.	240511
Basic Requirements	Appearance	Blue-green granule	Solution color	Blue
	Odor	Non-pungent odor	Gel Strength	-
	pH (25°C)	5.3	Loss On Drying	<5%
	Microbial Contamination	-	Clarity	Occasionally a small amount of white precipitate
Microbiological Test	Test Standard	LBT/ZY-QC-05-006-2019		
	Control Microorganism	Evaluation Standard	Test Result	
	<i>Salmonella Typhimurium</i> ATCC 14028	It grows along the puncture hole and is grayish white	It grows along the puncture hole and is grayish white	
	<i>Salmonella enteritidis</i> ATCC 13076	It grows along the puncture hole and is grayish white	It grows along the puncture hole and is grayish white	
	<i>Escherichia coli</i> ATCC 25922	Inhibited	Inhibited	
Remarks	<p>1. The culture conditions is 42°C/24h. 2. Add one vial of P-10A to 100mL CM245 base. 2.Seed should be inoculated, and the concentration of the original bacterial solution is 10⁸CFU/mL.</p>			
Test Result	Qualified
